Telecon Design

Multiple Locations, Canada

Telecon Design is a recognized leader in the Canadian telecommunications industry, providing professional and technical services for engineering, designing, building, and commissioning wireless and wire line telecom networks. The scope and scale of its services and capabilities are unrivaled in the marketplace. With more than 1,000 skilled employees in 19 offices across the country, the company provides clients with cost-effective and efficient network deployment, upgrade, and maintenance solutions, regardless of technology, project size, or location.
